## **EMERGENCY SNOW REMOVAL LIST**

In anticipation of the winter months, we must update our list of Heatherwood residents who have conditions requiring them to leave their homes on a regular and frequent basis in order to obtain specialized treatments for severe medical conditions. Examples are dialysis, chemotherapy, or treatments for life-threatening infections.

Our contractor will be instructed to see that these homes are cleared prior to beginning snow removal for the entire community. You should note that this instruction has been given for the past several years with mixed results and should not be considered a guarantee.

While we certainly wish to accommodate others who have health issues and/or continue to work, it is obviously necessary to keep the number on the list to an absolute minimum.

Attached please find a form for your use. It should be mailed to our management company at the address below, Attention: Property Manager Matthew Grilli, and all possible consideration will be given to your request.
